

# Snap Point of Sale - Email Template Documentation

## Overview

This is the official HTML email template for **Snap Point of Sale**. It is designed to be responsive, accessible, and compatible with all major email clients including Gmail, Outlook, Apple Mail, and Yahoo Mail.

## Files

| File                          | Description                                                       |
|-------------------------------|-------------------------------------------------------------------|
| email-template.html           | Preview version with embedded images (base64) for local viewing   |
| email-template-developer.html | Production-ready version with URL placeholders for your developer |

## Template Variables

Your developer needs to replace the following variables dynamically when sending emails:

| Variable                | Description                            | Example                               |
|-------------------------|----------------------------------------|---------------------------------------|
| {{user_name}}           | Recipient's first name                 | John                                  |
| {{inviter_name}}        | Name of the person who sent the invite | Sarah Johnson                         |
| {{role_name}}           | Role assigned to the user              | Cashier , Manager , Admin             |
| {{invite_link}}         | Full URL for invitation acceptance     | https://app.snappos.com/invite/abc123 |
| {{user_email}}          | Recipient's email address              | john@example.com                      |
| {{help_center_link}}    | URL to your help center                | https://help.snappos.com              |
| {{privacy_policy_link}} | URL to your privacy policy             | https://snappos.com/privacy           |

|                           |                                      |                                                    |
|---------------------------|--------------------------------------|----------------------------------------------------|
| <code>{{logo_url}}</code> | Hosted URL for the dark-bg logo      | <code>https://cdn.snappos.com/logo-dark.png</code> |
| <code>{{icon_url}}</code> | Hosted URL for the green circle icon | <code>https://cdn.snappos.com/icon.png</code>      |

## Brand Colors Used

### Plain Text

Primary Green: #2ECC71 (buttons, links, accents )  
 Dark Background: #1A1A2E (header, primary text)  
 White: #FFFFFF (backgrounds, button text)  
 Light Gray BG: #F8F9FA (footer, role box)  
 Body Text: #4A4A5A (paragraph text)  
 Secondary Text: #95A5A6 (footer text)  
 Border: #EAEAEA (dividers, box borders)

## Fonts

The template uses the following font stack:

- **Headings:** Poppins (Bold 700) with fallback to system fonts
- **Body:** Inter (Regular 400, Medium 500, SemiBold 600) with fallback to system fonts

For email clients that do not support web fonts, the template gracefully falls back to `-apple-system, BlinkMacSystemFont, 'Segoe UI', Roboto, Helvetica, Arial, sans-serif`.

## Image Hosting

Before deploying, host the following images on your CDN or asset server:

1. **Logo (dark background version):** `logos/snap-logo-dark-bg.png` — used in the email header
2. **Snap icon (green circle):** `icons/snap-icon-green-circle.png` — used in the role assignment box

Replace `{{logo_url}}` and `{{icon_url}}` with the hosted URLs.

## Outlook Compatibility

The template includes VML (Vector Markup Language) fallback for the CTA button to ensure it renders correctly in Microsoft Outlook desktop clients, which do not support CSS border-radius on links.

## Extending This Template

This same structure can be reused for other transactional emails:

- **Password Reset** — Change heading, body text, and button to "Reset Password"
- **Welcome Email** — After user accepts invite, send a welcome with onboarding steps
- **Receipt/Transaction** — Add a table in the body section for line items
- **Account Alert** — Change the accent color to red (#E74C3C) for alerts

Simply keep the header, footer, and overall structure the same, and modify the body content section.
